In light of all of Trump's appointments, nominees, and how Trump is with Putin, China, and North Korea, hopefully you have sufficient wherewithal to realize the very real threat that the United States is facing with what is tantamount to the resurrection of the Third Reich.

The only way to save the USA is to accept the truth, the entire 2024 election was rigged from the beginning to exclude Mathew Tyler simply and solely for having a physical disability.

The evidence is never going anywhere. This election will always be illegitimate as "[Fruit of the poisonous tree](#)", as such, for better and worse, any and all contracts will be illegitimate as well.

If these people were willing to violate the US Constitution and federal anti-discrimination laws, they are more than willing to violate the election in other ways too.

Discrimination for someone having a disability is a hate crime, some of your brethren will be going to prison for committing a hate crime, whether you join them or not is up to you.

All information is published online, <https://www.TylerPresident.com>.

It doesn't matter to me if it's 4 years, 8, 12, whenever, I will hold those that commit these crimes against me accountable.
